

## PCS Translate 8x8 Extensions to DIDs

Seamless 5-Digit Dialing Across Multiple 8x8 Tenants

## **Product Summary**

 Enables the ease of internal dialing across multiple 8x8 tenants for increased agent productivity

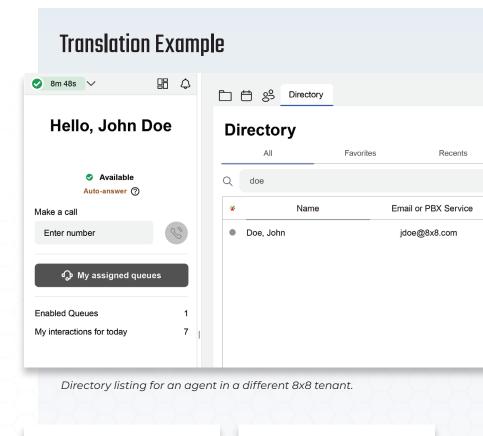

## **Product Description**

- Multiple 8x8 Tenants are utilized for scalability, autonomy and localized management. However, that requires inconvenient 10-digit long number dialing for internal communications.
- This browser extension transparently translates familiar 5-digit extension dial strings into their proper DID equivalents, so dialing between tenants feels like internal calling.

## **Product Requirements**

- · Works with 8x8 Contact Center.
- Chrome browser plugin for PCS Translate 8x8 Extensions to DIDs
- Please contact Palitto Consulting Services for more information on licensing.

Revised: December 10, 2025

Outbound call initiated using the Private 5-digit extension.
