

Product Summary

- Streamline the upload of scanned PO and WO documents into Innergy

Product Description

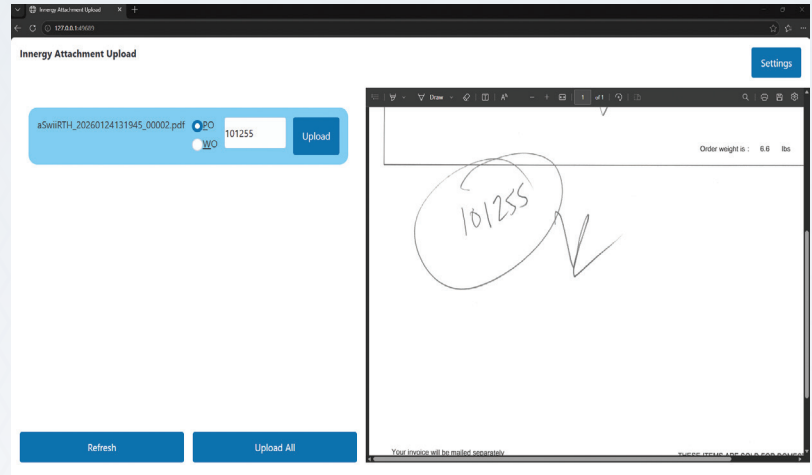

- **Scan:** Batch scan supporting documents using your existing office scanner. Scanned PDFs are saved to a designated network folder.
- **Classify:** Scanned documents are conveniently displayed within the application. Your team reviews each scanned document and enters the corresponding PO or WO number.
- **Upload:** The document is automatically uploaded and attached to the corresponding PO or WO within Innergy.
- **Archive:** The processed file is archived in a network folder.

Product Requirements

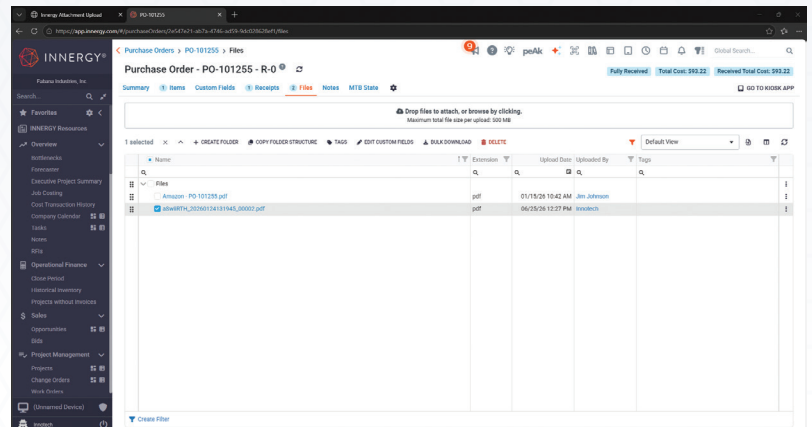

- Office scanner capable of saving scanned PDFs to a network folder.
- Windows 10 or newer.

Integration Example

Scanned document is displayed for classification

Uploaded document is attached in Innergy
